How to set the Digital Temperature Unit

1. Install the temperature probe onto the Digital Temperature Unit.
2. Plug unit into 240V AC
3. Plug fans into the 2 x IEC outlets
4. Press and hold the SET button for 3 seconds
5. The set LED should illuminate
6. Select the temperature you would like the fans to switch on with the up and down keys
7. Once you have reached the desired temperature, press and hold the SET for 3 seconds
